### **DETAILED ACTION**

1. Claims 1-10 and 36 were cancelled by the preliminary amendment of August 20, 2003.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Max (US Patent 6,497,794).

Max '794 discloses a separating method of separating a sample by a fluid, wherein a sample having a separation layer inside is separated at the separation layer while injecting a fluid at various fluid pressures. Since the fluid is being injected using a controllable pump, the variation in pressure of the fluid can be suppressed within a predetermined range to the separation layer of the sample.

### ***Allowable Subject Matter***

4. Claims 12 and 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 21-35 are allowed.

### ***Conclusion***

Art Unit: 3752

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Max '460 and Rhodes are pertinent to Applicant's invention.
